

MATERIAL SAFETY DATA SHEET

1. Product Identification

Trade Name: Block

Product Name: Beta-Cypermethrin 4.5% Emulsion in Water

2. Hazardous Components and Composition

Beta-Cypermethrin	4.5%
Aromatic Solvent	12%
Related impurities	0.3%

3. Typical Physical and Chemical Properties

Appearance	: White liquid
Odor	: Solvent /Soapy like smell
Specific gravity	: Approximate 1g/cc
Flash point	: Not applicable
Solubility in water	: Dispersible in water

4. Health Effects and Toxicity Data

Toxicological Data of active ingredient:

Oral LD₅₀ (rat): >1830mg/kg

Dermal LD₅₀ (rat): 649mg/kg

Inhalation LC₅₀ (rat) : NA.

Oral toxicity:

Slightly-Toxic

Dermal toxicity:

Non-Toxic

Inhalation toxicity:

Slightly Toxic

Skin irritation:

cause skin irritation

Eye irritation:

cause eye irritation

5. First Aid Procedure

Eye contact:

Rinse eyes with large amount of water until irritation subsides. If irritation persists, get medical attention.

Skin contact:

Flush with large amount of water; wash out with soap or detergent to if available.

Remove grossly contaminated clothing, including shoes, and launder before reuse.

Inhalation:

Wearing proper respiratory protection before rescues. Immediately remove the affected victim from exposure to an area of fresh air. Administer artificial respiration if breathing is stopped. Keep at rest. Call for prompt medical attention.

Ingestion:

If swallowed, DO NOT induces vomiting. Keep at rest. Get prompt medical attention

6. Fire and Explosion Hazard

Fire and explosion hazard:

Liquid residue can burn upon heating to temperature at or above the flash point.

`Empty' containers retain product residue (liquid and/or vapor) and can be dangerous.

Do not pressurize, cut, weld, braze, solder, drill, grind or expose such containers to heat, flame, spark, static electricity, or other sources of ignition; they may explode and cause injury or death.

Firefighting media:

Foam, dry chemical or water spray to extinguish fire

Firefighting precaution:

Prevent contaminated liquid from entering sewers watercourses, or low area.

7. Stability Reactivity

Chemical Stability:

Chemically Stable

Conditions to Avoid:

Avoid from heat and ignition source

Incompatibilities:

Avoid mixing with nitric acid, sulfuric acid and strong oxidizing agent.

Decomposition:

N/A

Polymerization:

This product should not occur any hazardous polymerization

8. Spill and Leak Control Procedure

Eliminate source of ignition. Wearing suitable protective equipment before handling to spills.. Prevent additional discharge of material, if possible to do so without hazard. Prevent liquid from entering sewers, watercourse or low area. For spills in public area, keep public away and advise local authorities.

Control procedure:

- Contain spilled liquid with sand or earth
- Recover by pumping or with a suitable absorbent.
- Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations.

9. Protective Equipment

For open system where contact is likely, wear safety glasses with side shields, long sleeves, and chemical resistant gloves. NIOSH/MSHA approved respirators may be necessary to prevent overexposure by inhalation. The use of local exhaust ventilation is recommended to control process emission near the source.

10. Storage and Transportation

Storage:

- Use proper grounding procedure to avoid electrostatic accumulation
- Cool temperature
- Dry Area
- Well ventilated premise
- Store away from food and feed products

Transportation:

Pesticide, liquid, Toxic, NOS

Class 6.1
