****	Winter Color	****	Red Thread Resistance
****	Spring Green-Up	****	Pink Snow Mold Resistance
****	Cold Tolerance	****	Leaf Spot Resistance
****	Dark Green Color	****	Fine Leaf Texture

- La Quinta's dark green genetic color, fine leaf texture and high density gives an added advantage in attractiveness along with its outstanding turf performance.
- La Quinta has one of the best overall performances for winter color, cold tolerance, and early spring green-up making it an excellent choice for winter overseeding in the Southwest.

PERFORMANCE HIGHLIGHTS

EXCELLENT SPRING GREEN-UP:

La Quinta comes out of winter running and its quick green-up will help lengthen your growing season.

- DISEASE & PEST PACKAGE: La Quinta exhibits good resistance to *Drechslera* leaf spot which is often an eyesore to quality turf throughout the US. It also has high resistance to red thread and pink snow mold, as well as good resistance to many other common turf pest and diseases.
- **LOWER MOWING HEIGHTS:** La Quinta has adaptability to various mowing heights. Proven performance at 7/16" (11 mm) on golf course fairways yet adaptable to the higher cutting heights of 1½" to 2" (37.5 to 50 mm) favored by parks and homeowners.
- **BLENDS WELL:** La Quinta is a valuable asset when used alone or in blends with other Jacklin varieties. Plant at 4-7 lb. per 1000 sq. ft. (20-35 g/m²). Mix with Kentucky bluegrasses at 20% La Quinta.

- DARK GREEN COLOR: La Quinta has attractive, very dark green genetic color that surpasses varieties like Pizzazz, Paragon GLR and Pinnacle II. Ranked in the Top 10 in national testing for winter color – La Quinta retains its dark green color in the winter months when you need it the most!
- <u>COLD TOLERANCE:</u> La Quinta has superior winter hardiness. In national trials, La Quinta had reduced winter damage at Minnesota, reduced low temperature injury at South Dakota, and little % winterkill at both North Dakota and Minnesota.
- WINTER OVERSEEDING: La Quinta was the top performer in an overseeding trial on dormant bermudagrass at Toscana Country Club in Palm Desert, Ca. La Quinta displayed excellent quality, color and density and can be mown down to putting green heights for overseeding.
